Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none">1. Financial2. Healthcare3. IT	Finance
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	There is interest in short-term trading for a stock currently priced at \$31.40. This price reflects a significant increase, standing 45.6% above the 52-week low of \$21.67 and 66.4% above the 52-week high.
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	In 2019, the S&P 500 has seen a 14% rise, demonstrating notable performance. However, it's not the sole index showing strong gains. The S&P Midcap 400 has surged by 16% during the same period, indicating robust performance in the mid-cap segment.
